Fall 2015—Algebraic Topology

Carlos Salinas

September 9, 2015

Contents

1 Metric Spaces

1.1 Open and closed sets

1.2 Completeness

1.3 The real line

1.4 Products of metric spaces

1.5 Compactness

1.6 Continuous functions

2 Topological Spaces

2.1 Topological spaces

2.2 Subspaces

2.3 Continuous functions

2.4 Base for a topology

2.5 Separation axioms

2.6 Compactness

2.7 Locally compact spaces

2.8 Connectedness

2.9 Path connectedness

2.10 Finite product spaces

2.11 Set theory and Zorn's lemma

2.12 Infinite product spaces

2.13 Quotient spaces

3 Homotopy Theory

3.1 Homotopic paths

3.2 The fundamental group

3.3 Induced homomorphism

3.4 Covering spaces
