Problem 2.1

Let \mathfrak{a} be an R -ideal and M a finite R -module. Show that $\sqrt{\text{ann}(M/\mathfrak{a}M)} = \sqrt{\text{ann}(M) + \mathfrak{a}}$.

Proof.

■

Problem 2.2

Let R be a local ring and M, N finite R -modules. Show that $M \otimes_R N = 0$ if and only if $M = 0$ or $N = 0$.

Proof.

■

Problem 2.3

Show that $R^n \cong R^m$ if and only if $n = m$.

Proof.

■

Problem 2.4

Prove 2.7.

Proof.

Problem 2.5

Prove 2.8.

Proof.

■

Problem 2.6

Prove 2.9.

Proof.

■

Problem 2.7

Prove 2.10.

Proof.

■
