

Fall 2015—Algebraic Topology

Carlos Salinas

September 8, 2015

Contents

Contents	1
1 Some Underlying Geometric Notions	2
1.1 Homotopy and Homotopy Type	2
1.2 Operations on Spaces	2
1.3 The Homotopy Extension Property	2
2 The Fundamental Group	3
2.1 Basic Constructions	3
2.2 Van Kampen's Theorem	3
2.3 Covering Spaces	3
2.4 Additional Topics	3
3 Homology	4
3.1 Simplicial and Singular Homology	4
3.2 Computations and Applications	4
3.3 The Formal Viewpoint	4
3.4 Additional Topics	4
4 Cohomology	5
4.1 Cohomology Groups	5
4.2 Cup Product	5
4.3 Poincaré Duality	5
4.4 Additional Topics	5

1 Some Underlying Geometric Notions

1.1 Homotopy and Homotopy Type

1.2 Operations on Spaces

1.3 The Homotopy Extension Property

- 2 The Fundamental Group
 - 2.1 Basic Constructions
 - 2.2 Van Kampen's Theorem
 - 2.3 Covering Spaces
 - 2.4 Additional Topics

3 Homology

3.1 Simplicial and Singular Homology

3.2 Computations and Applications

3.3 The Formal Viewpoint

3.4 Additional Topics

4 Cohomology

4.1 Cohomology Groups

4.2 Cup Product

4.3 Poincaré Duality

4.4 Additional Topics
