PROBLEM 13.1 (HANDOUT 17, # 16)

Suppose $X \sim \mathrm{Exp}(1)$, $Y \sim U[0,1]$, and X, Y are independent.

(a) Find the density of $X + Y$.
(b) Find the density of XY.

SOLUTION. For part (a): Since X and Y are independent, the distribution of $X + Y$ is given by the convolution

$$f_{X+Y}(x) = \int_{-\infty}^{\infty} f_X(x-y) f_Y(y)\, dy,$$

where

$$f_X(x) = \begin{cases} \mathrm{e}^{-x} & \text{for } x \geq 0, \\ 0 & \text{otherwise,} \end{cases} \qquad f_Y(x) = \begin{cases} 1 & \text{for } 0 \leq x \leq 1, \\ 0 & \text{otherwise.} \end{cases}$$

Therefore,

$$\begin{aligned} f_{X+Y}(x) &= \int_{-\infty}^{\infty} \chi_{[0,\infty)}(x-y)\mathrm{e}^{-(x-y)}\chi_{[0,1]}(y)\, dy \\ &= \mathrm{e}^{-x} \int_{-\infty}^{\infty} \chi_{[0,\infty)}\chi_{[0,1]}\, dy \\ &= \end{aligned}$$

■

Problem 13.2 (Handout 17, # 18)

Two points A, B are chosen at random from the unit circle. Find the probability that the circle centered at A with radius AB is fully contained within the original unit circle.

Solution. ■

Problem 13.3 (Handout 17, # 19)

Let X, Y be i.i.d. $U[0,1]$ random variables. Find the correlation between $\max\{X, Y\}$ and $\min\{X, Y\}$.

Solution. ∎
